

Philip Brey

Philip Brey (Ph.D., University of California, San Diego, 1995) is associate professor of philosophy of technology and chair of the department of philosophy, University of Twente, the Netherlands. He is also director of the Centre for Philosophy of Technology and Engineering Science (CEPTES) and a member of the management team of the Centre of Excellence for Ethics and Technology of the Universities of Twente, Delft and Eindhoven. He is a member of the executive board of the Society for Philosophy of Technology and of the International Society for Ethics and Information Technology, and is a member of the steering group of the European division of the International Association of Computing and Philosophy. He previously taught at Delft University of Technology and the University of California, San Diego. Brey's research focuses on philosophy of technology, with special attention to the philosophy and ethics of information and communication technology (ICT). He has published on the ethical and political aspects of computer systems design, the limits of artificial intelligence, the ethics and ontology of virtuality, the relation between information technology, security and privacy, the implications of ICT for globalization, geographical organization and the quality of life. He is co-editor, with Thomas Misa and Andrew Feenberg, of *Modernity and Technology* (MIT Press, 2003) and editor of two special issues of the journal *Ethics and Information Technology*. He currently manages a five-year research project that involves three postdocs and several PhD student and that focuses on the implications of new media for the quality of life.
